PROFESSIONAL SUMMARY

Statistics graduate (B.Sc. Hons.) with 2.5 years in insurance operations, applying SQL, Power BI, and statistical reasoning to quality and process optimization problems. Pivoted operational pattern-detection work into structured analytics projects covering cleaning, validation, profitability, and KPI reporting aligned to business objectives. Collaborative, accuracy-first analyst looking to bring an operations-grounded approach to a data team.

TECHNICAL SKILLS & TOOLS

Programming & Querying: SQL (MySQL — CTEs, window functions, query optimization), Python (Pandas, NumPy)

Spreadsheet Tools: Advanced Excel (Pivot Tables, Power Query, VLOOKUP, INDEX-MATCH)

Business Intelligence & Visualization: Microsoft Power BI (Data Modelling, DAX, Power Query, Star Schema, Bookmarks, Drill-through, Field Parameters)

Statistics: Hypothesis Testing, A/B Testing, Regression Analysis, Probability, Statistical Inference

Analytics: Exploratory Data Analysis (EDA), Key Performance Indicators (KPI) Reporting & Dashboard Development, Statistical Analysis, Data Cleaning, Data Validation, Business Analytics, Root-Cause/Error-Pattern Analysis

PROJECTS

E-Commerce Profitability & Marketing Performance Analysis

Tools: MySQL, Power BI, DAX, Data Modelling

- Cleaned, transformed, and validated multi-channel sales and marketing datasets using SQL.
- Analysed profitability, return behaviour, platform fees, discounts, and marketing efficiency to identify business improvement opportunities.
- Diagnosed margin pressure in Books and Beauty categories driven by discount dependency, versus stronger contribution from Electronics, Toys, and Sports.
- Quantified channel-level profit leakage: Marketplace and Social Commerce reduced retained profit through platform fees and discount-heavy sales, while Website and Mobile App outperformed.
- Analysed marketing acquisition platforms and identified TikTok Ads (ROAS-24.44) and Influencer Marketing as high performers; proposed **budget reallocation strategy** estimated to reduce marketing spend by 16–20% without reducing acquisition volume.
- Built interactive **star-schema** profitability model dashboard in Power BI with DAX measures, field parameters, a dynamic Profitability Health Indicator, Return Rate Simulator, and drill-through navigation for stakeholder reporting and ad-hoc analysis.
- Applied SQL techniques including CTEs, Window Functions, Conditional Aggregation, and multi-level KPI validation to generate actionable business insights.

Music Store Business Analysis (Chinook Dataset)

Tools: MySQL, Window Functions, CTEs

- Ran a **Pareto**/concentration analysis on customer revenue and found spend distributed across a broad base rather than concentrated in a few accounts, indicating low customer-concentration risk.
- Used LAG-based year-over-year revenue trend analysis to isolate a decline in customer engagement (order frequency) as the driver of falling average order value, ruling out genre mix shift as a competing **hypothesis**.
- Examined genre popularity, geographic preferences, spending patterns to surface key business opportunities for targeted marketing and inventory decisions.
- Leveraged advanced **SQL** techniques — Joins, CTEs, Window Functions, Aggregations, and Ranking Functions — to deliver structured, data-driven insights.

WORK EXPERIENCE

Process Associate

Jan 2024 – Present

Sun Life | Gurugram, India

- Maintained **96.61%** escalation-free rate by ensuring accuracy while working under pressure across a 5-day structured policy workflow with multiple critical checkpoints daily, processing ~26 cases monthly.
- Performed data validation and quality checks across multiple policy administration systems, ensuring data accuracy before downstream processing.
- Maintained process documentation to support consistent policy administration and quality standards.
- Collaborated with cross-functional teams to resolve policy-related discrepancies, ensuring accurate policy administration and timely issue resolution.
- Recognised by Canadian training partners for workflow accuracy and process ownership; received **4/5** performance rating (2025). Awarded Rising Star (GB Admin Team, March 2024).

CORE COMPETENCIES

Communication Skills, Problem Solving, Critical Thinking, Attention to Detail, Stakeholder Communication, Continuous Improvement, Decision-Making, Analytical Thinking, Time Management

EDUCATION

B.Sc. (Hons.) Statistics

2020 – 2023

Mata Sundri College for Women, Delhi University | Delhi

CGPA: 8.0 | **Relevant coursework:** Statistical Inference, Regression Analysis, Probability Theory, Data Analysis

Volunteer, National Service Scheme (NSS) (2-year engagement) — Demonstrated leadership capabilities by teaching Mathematics and Science to primary-level students and co-organizing multiple community outreach events

CERTIFICATIONS

- Microsoft Power BI – Udemy (Data visualization, DAX, star schema modelling, interactive dashboards)
- Microsoft Excel – Udemy (VLOOKUP, INDEX-MATCH, Pivot Table, Data Validation)
- SQL for Data Analysis – Advanced SQL querying techniques – Udemy
- Tableau Workshop — Jobaaj Learnings (Introduction to Tableau Desktop and data visualization fundamentals)
