

TANVI ANAND

Data Analyst/ Business Analyst

+91 98103 00486 • tanvianand291@gmail.com • linkedin.com/in/tanvianand11 • github.com/TanviAnand11

PROFESSIONAL SUMMARY

Statistics graduate with 2.5 years of professional experience in insurance operations, and transitioning to analytics by applying Power BI, SQL, Python, and statistical reasoning to business problems. Pivoted operational pattern-detection work into structured analytics projects covering cleaning, validation, profitability, dashboard development, and KPI reporting aligned to business objectives. Collaborative, accuracy-first analyst looking to bring an operations-grounded approach.

TECHNICAL SKILLS & TOOLS

SQL (MySQL) — CTEs, window functions, query optimization

Python for Data Analysis - Pandas, NumPy, Matplotlib

Advanced Excel - Pivot Tables, Power Query, VLOOKUP, INDEX-MATCH

Microsoft Power BI – Power Query (M), DAX, Data modelling, Data visualization, Bookmarks, drill-through, field parameters

Statistics - Hypothesis Testing, A/B Testing, Regression Analysis, Probability, Statistical Inference

Analytics - Exploratory Data Analysis (EDA), Key Performance Indicators (KPI) Reporting & Dashboard Development, Statistical Analysis, Data Cleaning, Data Validation, Business Intelligence, Root Cause Analysis

Gen AI: ChatGPT, Claude, Microsoft Copilot, Prompt Engineering

PROJECTS

Cart Abandonment – in progress

Tools: Python, MySQL

- Investigated cart abandonment (**75.83%**) across 2.2M+ e-commerce events using Python and SQL; identified time-of-day as the dominant driver, with Night/Overnight sessions abandon at 76–77% vs 51% during Morning, a 26pp gap confirmed via chi-square ($p < 0.001$).
- Tested 4 hypotheses across category, brand, price, and hour segments; statistically ruled out price as a primary driver (Cramér's $V = 0.049$).
- Designing A/B tests to evaluate potential cart recovery strategies.

E-Commerce Profitability & Marketing Performance Analysis

Tools: MySQL, Power BI, DAX, Data Modelling

- Cleaned and validated multi-channel sales and marketing datasets using SQL.
- Analysed profitability, return behaviour, platform fees, discounts, and marketing efficiency to identify business improvement opportunities.
- Analysed marketing acquisition platforms and identified TikTok Ads (ROAS-24.44) and Influencer Marketing as high performers; proposed **budget reallocation strategy** estimated to reduce marketing spend by 16–20% without reducing acquisition volume.
- Built an interactive star-schema profitability model dashboard in Power BI with DAX measures, field parameters, KPI cards, a waterfall chart to visualize revenue breakdown, a dynamic Profitability Health Indicator, Return Rate Simulator, and drill-through navigation for stakeholder reporting and ad-hoc analysis.
- Used AI tools (ChatGPT, Claude) to accelerate SQL query drafting, Power BI DAX development, and documentation — validating all outputs manually before use in analysis.

Music Store Business Analysis (Chinook Dataset)

Tools: MySQL, Window Functions, CTEs

- Ran a **Pareto**/concentration analysis on customer revenue and found spend distributed across a broad base rather than concentrated in a few accounts, indicating low customer-concentration risk.
- Used LAG-based year-over-year revenue trend analysis to isolate a decline in customer engagement (order frequency) as the driver of falling average order value, ruling out genre mix shift as a competing **hypothesis**.

WORK EXPERIENCE

Process Associate

Jan 2024 – Present

Sun Life | Gurugram, India

- Maintained **96.61%** escalation-free rate by ensuring accuracy across a 5-day structured policy workflow with multiple critical checkpoints daily, processing ~26 cases monthly.
- Identified automation opportunities to reduce manual effort and errors by analysing recurring operational bottlenecks.
- Performed data validation and quality checks across multiple policy administration systems, and collaborated with cross-functional teams to investigate and resolve policy discrepancies before downstream processing.
- Developed weekly Excel reports to monitor CWR compliance across the team, highlighting process adherence gaps and improving operational visibility across the team.
- Recognised by Canadian training partners for workflow accuracy and process ownership; received **4/5** performance rating (2025). Awarded Rising Star (GB Admin Team, March 2024).

EDUCATION

B.Sc. (Hons.) Statistics

2020 – 2023

Mata Sundri College for Women, Delhi University | Delhi

CGPA: 8.0 | **Relevant coursework:** Statistical Inference, Regression Analysis, Probability Theory, Data Analysis

Volunteer, National Service Scheme (NSS) (2-year engagement) — Demonstrated leadership capabilities by teaching Mathematics and Science to primary-level students and co-organizing multiple community outreach events

CERTIFICATIONS

- Microsoft Power BI Desktop – Udemy
- SQL for Data Analysis – Advanced SQL querying techniques – Udemy
- Microsoft Excel – Udemy
- Deloitte Data Analytics Job Simulation – Forage
- Tableau Workshop — Jobaaj Learnings (Introduction to Tableau Desktop and data visualization fundamentals)
